DC Access Increases Wireless Internet Speeds for all Service Levels
Friendly, local WiFi is now faster than ever – prices remain the same

Washington, DC – DC Access has increased WiFi speeds for customers at every service level. The increases double the speed for most DC Access subscribers. Those with the basic service level will see an increase from 500kbps to 1Mbps. Those at the highest service level will see a jump from 1.5Mbps to 2.5Mbps.

“This speed increase gives our current customers even greater value for their dollar, while allowing DC Access to remain competitive with national broadband providers,” says Martha Huizenga, partner at DC Access. “We pride ourselves on offering friendly, local service, and that’s still what sets us apart, but now our customers will also enjoy faster speeds.”

Service levels and speed increases are as follows:

Monthly fee	Download speed	Upload speed	Great for...
\$29	Increase from 500kbps to 1Mbps	200kbps	Web Browsing, Email, MP3s, Online Games
\$49	Increase from 1 Mbps to 2Mbps	200kbps	Web Browsing, Email, MP3s, Online Videos
\$89	Increase from 1Mbps to 2Mbps (+Internet Routable IP Address)	2Mbps	Web browsing, Email, Streaming Audio, Office Internet Sharing
\$119	Increase from 1.5Mbps to 2.5Mbps (+Internet Routable IP Address)	2.5Mbps	Web browsing, Email, Streaming Video, Office Internet Sharing

“We didn’t just increase speeds for our premium business customers because we understand that individual users also feel the need for speed more than they did just a few years ago,” says Matt Wade, president at DC Access. “Many of our customers are self-employed or work from home on a regular basis, and many more people are using their computers to watch movies, play games, and participate in social networking.”

ABOUT DC ACCESS, LLC

2009 marks the 10th anniversary of DC Access, which is owned and operated by the husband-and-wife team of Matt Wade and Martha Huizenga. DC Access, which is privately held and headquartered on Capitol Hill, is DC’s first and only Wireless Internet Service Provider (WISP). DC Access also provides nationwide web hosting and nationwide dial-up. To learn more, visit www.dcaccess.net.
